## INTRODUCTORY.

---

In presenting to the public our Sixth Annual Directory of the city of Cleveland, for 1876-77, there appears to us to be little necessity for extended remarks, by way of preface or introduction, our relations with the public in this particular work being well established, and we have reason to know, appreciatively recognized. Experience, industrious application, and patient care, are the conditions to the attainment of the greatest practicable perfection in a work of this character. In six years we have not failed to gain largely of the first essential, while nothing has been wanting to the fullest employment of the others. We therefore feel free to speak of our Directory as comparing favorably in general thoroughness, accuracy, convenience of arrangement, and typographical appearance, with any issued in the country.

We invite particular attention to the map of the city accompanying the Directory. This map was prepared with the greatest possible care, from the latest surveys by the city engineer, and will be found complete and perfectly accurate in every detail. It embraces all the new streets laid out under the late act of the Council, conspicuously defines the boundaries of the wards, shows the location of the projected breakwater, and is supplied with an index of the streets, alphabetically arranged, by which the inquirer may readily ascertain the location of each. In all other respects this map of Cleveland is the most thorough ever published.

A carefully prepared Directory is the most trustworthy source from which to obtain the figures of population. This work contains 46,923 names, which multiplied by  $3\frac{1}{2}$ , the generally received method of computation, gives 164,230 as the present total number of inhabitants of the city. This is a very small increase upon the population at the date of the issue of our last preceding Directory, but in view of all the circumstances conducing to the depletion of population, there is abundant cause for gratulation in the fact that Cleveland has suffered no retrograde in this respect during the year.

For the information of the curious, we give upon the following page in tabular form the number of names occurring in each letter of the alphabet—also the number of co-partnerships and incorporated companies:

In conclusion, we desire to express to our subscribers and the business community our cordial acknowledgments for the support accorded us, which we refer to as gratifying evidence of the acceptability of our previous efforts to give Cleveland a trustworthy Directory. Confidently looking forward to another year which shall bring with it increased prosperity to our beautiful city, we submit our present work to the careful examination and candid judgment of the public.

Respectfully,

ROBISON, SAVAGE & CO.

## COAL COMPANY

ARE MINERS AND  
SHIPPERS OF

**Steubenville, Walnut Hill, [Pitts-  
burgh Coal Seam,] Columbiana,  
Brier Hill, XX Shawnee  
and Blossburgh.**

These Coals have been in use for several years, by many of the Principal Railroads, for Locomotives, and by large Manufacturing Works, for Steam Rolling Mill and Forge Purposes, with entire satisfaction.

---

In the "Table of Heating Power of Fuels," Report of Geological Survey of Ohio, the heating power or intensity of heat of Coals tested is given as follows:

Pure Charcoal,	-	-	100.
Columbiana Coal,	-	-	99.7
Steubenville,	-	-	97.6
Brier Hill,	-	-	96.8
XX Shawnee or Straitsville,			94.8

---

Our Walnut Hill, in addition to its superior qualities for Steam and Rolling Mill purposes, excels nearly all the Coals of Ohio, in being less broken up by handling in the process of shipping.

We make a Superior Nut Coal, it being double screened at the mines. We also make a Pea Coal which is now being used extensively for Steam and Smithing purposes, and is the product of the purest coal in the mines.

We have facilities for producing and shipping by Rail or Lake in large quantities. Consumers of Coal, especially those who consume largely, will find it to their interest to examine into the character and work performed by these Coals.

We can upon application give references as to their practical value for the purposes named, also facts and figures showing the economy of their use.

**FIRE INSURANCE COMPANY,  
OF WATERTOWN, N. Y.**

## THE PIONEER DWELLING HOUSE INSURANCE COMP'Y.

with large Assets, considering the safety of its Risks. No Company can be founded on a sounder basis; its Risks are absolutely safer than Companies doing a general business.

IT INSURES NOTHING MORE HAZARDOUS THAN

## DWELLING HOUSES.

It has a large surplus for Policy Holders.—Assets \$694,075.63.

*It pays Losses by LIGHTNING, whether Fire ensues or not.*

No Company can be on a SOUNDER basis, and few, if any, more PROSPEROUS. Its large re-insurance reserve, with its capital set aside for the protection of its Policy Holders, makes them DOUBLY SECURE.

# STREET AND AVENUE GUIDE.

## EXPLANATION.

On referring to this Directory, it will be noticed that the names of streets, avenues, etc., follow each other in strictly alphabetical order, without regard to location. To all the *more important* streets and avenues are subjoined the names and numbers of intersecting streets, avenues, etc., in the order in which they occur, so that if you wish to find, say No. 827 St. Clair, by reference to the Guide you will find that St. Clair crosses Case av. at No. 820 and Lyman at No. 840, hence, the place you seek is between these two numbers, and nearest to Case av. Where no numbers are designated, the corner is vacant or occupied by a church or school house. In locating the small, obscure or most distant streets, pains have been taken to give the line of street cars by which they can be most easily reached.

On referring to this Directory, it will be found that the names of streets, avenues, etc., follow each other in alphabetical order, without regard to location. The figures set opposite the name of the street indicate the ward in which the name occurs on the map—Water street for instance will be found in the 3d ward; Huron in the 1st, etc., etc.

Entered, according to Act of Congress, in the year 1876, by Robert S. Swayne and others, in the Office of the Librarian of Congress at Washington.
